

Advanced Paediatric Dermatology

Resident and specialist Course | 27-28 April 2023 | Budapest, Hungary

Description

The training course for Advanced Pediatric Dermatology will be organised in the famous capital of Hungary. Well-known, respected and highly knowledgeable professors accepted to take part on this meeting, which were successfully organised already in the past.

The Course offers interesting lectures primarily for colleagues dealing with pediatric dermatology. In our rapidly changing world, new guidelines and new therapeutic approaches appear every day, a summary of these will be presented during the Course. In addition, the most interesting patients and personal patient presentations are also added to the programme. The valuable knowledge that can be reached in a friendly environment will give an unforgettable experience for the participants.

Learning Objectives

1. Learn new theories in Paediatric Dermatology
2. Get to know the best clinical practices for newborns
3. Explore differential diagnostic clues in Paediatric Dermatology

Faculty

Chair: Zsuzsanna Szalai
