

Hair and Scalp Diseases

Residents and Specialists Course | 20-22 October 2023 | Bologna, Italy

Course description

This course represents a basis for approaching hair diseases. In fact, it starts by knowing the basics of the anatomy and physiology of the scalp and hair in order to be able to recognize pathological alterations. With the help of experts in the field, we then evaluate all the characteristics of the various scalp diseases.

Furthermore, in this course you will learn about instrumental examinations, both invasive and non-invasive, for the diagnosis of hair diseases and understand which is the best diagnostic and therapeutic procedure.

Finally, all the concepts analysed will be confirmed with the practical part where you can learn and really evaluate how to use the tools for the diagnosis of hair diseases.

In the final part we share the clinical cases of the various students to reinforce the knowledge learned during the course.

Learning objectives

1. Perform a correct clinical examination of patients with hair/scalp diseases
2. Know trichoscopy signs and their diagnostic role
3. Manage patients with hair/scalp diseases prescribing cure and perform in periodic assessment of efficacy

Faculty

Chair: Bianca Maria Piraccini, Michela Starace
Speakers: Lidia Rudnicka, Aurora Alessandrini, Vincenzo Piccolo
