

Tropical Dermatology

Residents and Specialists Course | 19-21 June 2024 | Amsterdam, the Netherlands

Description

Knowledge of Tropical Dermatology is becoming increasingly important in the dermatology clinics of Europe due to imported skin diseases from either returning travellers or incoming migrants/refugees.

With the current worldwide migration, the issue of tropical knowledge is especially acute.

The course will address this specific need as well as equipping the European dermatovenereologist with skills to take out to tropics, as well as resource poor destinations.

The Tropical Dermatology course is organized by the members of the EADV Task Force on Tropical Dermatology.

Learning Objectives

1. Expand understanding of imported dermatology and tropical skin diseases
2. Acquire knowledge and skills to diagnose and treat skin conditions in returning travellers or migrants
3. Learn the fundamentals on how to work in tropical countries and/or resource poor destinations

Faculty

Chairs: Markus Starink, Colette van Hees

Speakers: Federica Dassoni, Andreas Montag, Helmut Schöfer

Tutors: Thecla Hekker, Koos Sanders
