

Masterclass: Facial dermatoses

Residents Course | 18 May 2024 | Malta

DESCRIPTION

In an unicist topography, face is the anatomic location of frequent or rarer pathologies both managed by all private and hospital dermatologists. Yet these facial dermatoses are often a burden to the patient, due to their displaying and sometimes chronic nature. The face can also be the site of systemic diseases, sometimes initially and revealingly, and can be affected by multiple extra-facial dermatoses, or toxicities of anti-cancer treatments, the management of which may.

These facial dermatoses may also require the implementation of a specific approach when they occur on pigmented skin.

New medical or interventional therapeutics have recently been proposed, some of them are still off-label (e.g. topical tacrolimus in seborrheic dermatitis, isotretinoin in rosacea, spironolactone in acne, etc.).

This full-day course aims to provide basic and practical knowledge on

- 1) specific conditions located on face exclusively
- 2) specificities of different diseases when located on face
- 3) therapeutic aspects and challenges with facial dermatosis

The teaching programme will bring up-to-date guidelines and evidence-based practice, provided by a panel of European leading experts.

The live courses will consist in 15 to 30-minutes lectures focusing on key points highlighted by experts on each topic, combined with interactive clinical cases discussions bringing up together speakers and attendees.

These unique cases discussions will allow participants to test their diagnostic knowledge based on « quizzes » and allow speakers to share their experience around real-life case studies selected from their practice.

LEARNING OBJECTIVES

- Improve knowledge of facial dermatoses.
- Improve management of patients with facial dermatoses, including complex cases.
- Recognise complex situations and discuss different strategies based on case studies.
- Describe new medical or interventional therapeutic approaches in an evidenced based approach.

FACULTY

Course Chairs: Marie-Aleth Richard, Elena Rossi
Speakers: Michael Boffa, Aveen Connolly, Ophelia Dadzie, Jose Luis López Estebanz, Alexander Katoulis, Nausicaa Malissen, Marie-Aleth Richard, Elena Rossi, Ditte Marie Saunte.

PROGRAMME

09:00-09:10	Welcome and introduction - <i>Marie-Aleth Richard, Elena Rossi</i>
09:10-09:30	Benign tumours and dysembryoplasias/hamartomas, vascular lesions, facial lesions of genodermatoses - <i>Michael Boffa</i>
09:30-09:50	Acne vulgaris and facial localisation of HS - <i>Marie-Aleth Richard</i>
09:50-10:10	Seborrheic dermatosis and sebopsoriasis and atopic dermatitis – <i>Marie-Aleth Richard</i>
10:10-10:30	Rosacea and related disorders (Periorificial dermatitis, mixt facial dermatosis, demodecidiose) - <i>Nausicaa Malissen</i>
10:30-10:50	Facial involvement in patients with systemic diseases, connectivitis and photodermatosis - <i>Aveen Connolly</i>
10:50-11:10	Facial dermatosis on pigmented skin - <i>Ophelia Dadzie</i>
11:10-11:50	Coffee Break and refreshments
11:50-12:10	Facial pigmented disorders: vitiligo, melasma - <i>Jose Luis López Estebaranz</i>
12:10-12:30	Facial lesions and cutaneous toxicities with systemic anti-cancer treatment <i>Nausicaa Malissen</i>
12:30-12:50	<i>Clinical cases part 1 - All faculty</i>
12:50-14:30	Lunch Break
14:30-14:50	Generality, anatomy and physiology - <i>Alexander Katoulis</i>
14:50-15:10	Granulomatosis facial dermatoses (sarcoidosis, granuloma faciale, Melkersson-rosenthal) - <i>Alexander Katoulis</i>
15:10-15:30	Facial infections (erysipelas, lupus tuberculosis, leishmanioses, zona, warts, kerion) - <i>Ditte Marie Saunte</i>
15:30-15:50	Cutaneous side effects of fillers and aesthetic interventions on face - <i>Elena Rossi</i>
15:50-16:10	Specific treatment of facial dermatosis: laser, depigmentants, fillers, toxin, peelings, make up - <i>Elena Rossi</i>
16:10-16:30	<i>Clinical cases part 2 - All faculty</i>
16:30-17:00	Closing remarks and farewell
17:00-18:30	Networking event with speakers and participants

The programme might be subject to change
