

Intermediate Surgery

Residents & Specialists Course | 27-29 June 2024 | Thessaloniki, Greece

Description

This course is proposed to people that are familiar with basic surgical techniques, already perform elliptical excisions and know how to place simple cutaneous and subcutaneous sutures. The participants will listen to theory of more advanced surgical techniques and perform then the presented techniques on pig heads under the guidance and supervision of the speakers. The goal of this course is to familiarise the participants with more advanced closures and reconstructions of defects so that they feel comfortable to apply these techniques in clinical practice.

Learning Objectives

1. Understand how to variate elliptical excision, more sophisticated sutures, and theory of skin grafts,
2. Identify how to plan a flap according to the location of a defect,
3. Perform various commonly used flaps.

Faculty

Chair: Myrto Trakatelli

Speakers: To be confirmed
