

Injectables: Theoretical and Practical Training on Cadavers

Specialists Course | 01-03 March 2024 | Thessaloniki, Greece

Description

This course teaches the detailed anatomy of the face related to dermal filler treatments. Learning face anatomy is essential to further improve the results of your aesthetic procedures and minimize the risk of possible complications. The course is structured in different parts to allow you the time to focus your attention sequentially on specific anatomical areas that you may be interested in. The learning experience is based on both a theoretical part as well as practical demonstrations and “hands on” applications.

Learning Objectives

1. To provide detailed training in facial anatomy
2. To master correct and optimal administration of fillers and botulinum toxin
3. To learn different application techniques (needle vs cannula)
4. To understand how to minimize the risk of complications

Faculty

Chair: Myrto Trakatelli
Speakers: Elena Rossi, Hassan Galadari, Diana Gavril, Firas Hameden
Tutors: Konstantinos Kalokasidis, Konstantinos Gritzalas, Stella Siskou
Assistants: Athena Daponte, Valia Papadopoulou

Programme

Friday, 01 March 2024

Theoretical session

14.00-14.20	Introduction of the course
14.20-14.40	Properties of hyaluronic acid: What and where - Myrto Trakatelli
14.40-15.00	Anatomy for botulinum toxin injections - Diana Gavril
15.00-15:20	Upper third of the face - Hassan Galadari
15.20-15:40	Midface – Firas Hameden
15.40-16.00	Lower third of the face - Myrto Trakatelli, Diana Gavril
