EADV President's welcome letter

Dear Colleagues,

On behalf of the entire EADV Board, I am delighted to welcome you to our EADV Congress in Amsterdam. This hybrid event offers both onsite delegates and remote participants the chance to update their clinical knowledge and engage in the latest advances in dermatology and venereology.

The congress will be opened by an internationally renowned keynote speaker Dr. Bertrand Piccard, who will spotlight the human impact on the climate and suggest actionable steps we can take in our personal lives to protect our planet. The scientific congress programme promises deep structured insights into all major fields of dermatology and updates on hot topics, including rapid changes in the understanding and treatment of common diseases such as atopic dermatitis, psoriasis, and skin cancer – from surgery to systemic therapy. Special focus sessions will provide a 'deep dive' into bullous diseases, hidradenitis suppurativa and cutaneous lymphomas.

Expect nine more plenary lectures from global experts on topics of broad relevance. The 2024 EADV Congress is session rich with 160+ thematically perfectly structured symposia, more than 20 subspecialty sessions and the extremely popular "Late breaking news". To foster direct exchanges, we will showcase more than 3600 ePosters, engage delegates in hands-on workshops and provide practical insights delivered by over 600 leaders in dermatology and venereology.

Most esteemed figures in the field of dermatology and venereology from Europe, USA, Asia and other continents will share their latest insights in clinics and clinical research. The 2024 EADV Congress will present a high-level of scientific content and a 'Residents Track' and new 'EADV Games' dedicated to young dermatologists.

The Congress is being hosted at the RAI Amsterdam congress centre. Nestled in the heart of the city, it is one of Europe's most prominent and modern venues, committed to environmental sustainability and innovative technologies. With its leading-edge technology, the RAI offers most practical approaches for popular plenary sessions, symposia, ePosters and novel interactive formats.

Amsterdam is known for its unique artistic heritage, elaborate canal systems and houses with gabled facades - a legacy of the city's 17th-century Golden Ages. Beyond the 2024 EADV Congress, Amsterdam offers an unforgettable atmosphere that each of us will cherish.

As president, I am committed to continuing the path of transformation initiated by my predecessors, towards the professionalisation of our academy. The recent success of our congress programming by the Scientific Programming Committee, evidenced by the record-breaking attendance in Berlin, underscores our achievements as an academy. I look forward to personally welcoming you where we will jointly experience the vibrant spirit of dermatology and venereology.

Welcome from the EADV Scientific Programming Committee

Dear Colleagues,

A warm welcome to the 33rd EADV Congress in Amsterdam! We are thrilled to present an outstanding program that showcases the very best in dermatology. This year's congress is packed with cutting-edge advancements and practical insights on how to integrate these innovations into your clinical practice.

With 600 exceptional speakers, each carefully selected for their expertise, you'll experience an array of engaging talks covering the entire spectrum of dermatology.

Our mission is to make this the most unforgettable dermatology congress ever—a gathering that truly has something for everyone. Whether you're from academia, private practice, or just starting your career, this congress is designed with you in mind.

As in the past, we've organized sessions into "Updates," "Training and Education," and "Controversies," with the ever-popular "Focus on" sessions diving deep into hot topics like bullous diseases, hidradenitis suppurativa, and cutaneous lymphomas.

This year, we're placing a special emphasis on the future of dermatology with a full-day "Resident's Track," crafted by and for young dermatology professionals. And don't miss the thrilling EADV GAMES—a dermatology quiz where residents from 18 European countries will battle it out for the top spot. It's going to be a competition like no other!

Our plenary talks will feature nine world-renowned speakers addressing the hottest topics in dermatology today, from neoadjuvant therapy in melanoma to the role of artificial intelligence, climate change, JAK inhibitors, pustular psoriasis, and STIs. Be sure not to miss the Opening Lecture by the legendary explorer Bertrand Piccard, who will deliver an inspiring message on resilience, drawing from his epic, solar-powered journey around the world.

This year, we've set a new record with the number of abstract submissions—over 4'200! We've handpicked the most groundbreaking research to be featured in the Late-Breaking News sessions, Free Communications, and our newly introduced ePoster showcase sessions.

Our Congress will continue to offer "Hands-on Workshops," a cherished tradition. And last but not least, "Subspecialty Sessions" will be held on Wednesday morning and Saturday early afternoon, with in-depth explorations of specific topics.

If you can't join us in person, you can still participate virtually, with live-streamed sessions available on our Congress online platform.

Join us in Amsterdam and help us make the 2024 EADV Congress an extraordinary and unforgettable experience!

The Academy

Founded in 1987, the European Academy of Dermatology and Venereology is a global community with the unifying goal of advancing excellence in patient care, promoting knowledge and expertise among healthcare professionals, as well as advocating on behalf of the specialty and patients.

EADV is a leading provider of education in dermatology-venereology through a unique blend of in-person and online courses, as well as digital learning tools including webinars and podcast episodes.

The Academy offers several scholarships, grants, and research funding opportunities, enriching networks and knowledge-sharing among future leaders in the specialty. EADV actively promotes better awareness of skin and venereal diseases by working closely with global and European policymakers on public health campaigns to tackle occupational skin diseases, melanoma, sexually transmitted infections, and other diseases.

The Journal of the European Academy of Dermatology and Venereology (JEADV), publishes a wide range of articles that focus on basic science, clinical and translational research in dermatology and venereology. With an Impact Factor of 8.4, it is now ranked 5th among the international dermatology journals. The JEADV Clinical Practice is the open-access peer-reviewed publication of EADV. It features cutting-edge educational and clinically orientated content, for aspiring researchers, to showcase the latest hands-on practices in clinics and innovative clinical and surgical skills.

Every year EADV holds a flagship Congress in the autumn and a smaller Symposium in the spring, which together attract over 18,000 delegates from around the world, exchanging ideas, experiences and projects to improve patient care.

Continuing medical education – Continuing professional development (CME-CPD)

The EADV Congress 2024, Amsterdam, Netherlands, 25-28 September 2024, has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with **24.0 European CME credits (ECMEC@s)**. CME Credits Each medical specialist can claim only those hours of credit actually spent in the educational activity (as recorded by the scanning process or online access). Here below find the breakdown of credits per day:

- Wednesday 25 September 6 credits
- Thursday 26 September 6 credits
- Friday 27 September 6 credits
- Saturday 28 September 6 credits

The accreditation system is based on 1 ECMEC per hour.

No credits will be guaranteed by the EADV to delegates participating in the following sessions: industry sessions, subspecialty sessions, allied healthcare professionals workshop, ePoster showcases, Residents track and EADV Games.

Procedure to gain your credits

Scan your badge, complete the evaluation forms and download the CME-CPD Certificate.

The EADV offers individual CME-CPD participation through the scanning of the bar code and the speaker/session evaluation that will be available for a period of 3 months after the end of the Congress (until 31 December 2024).

1. Scan your badge as you pass through the entrance of each session hall (or access the session online, live or on-demand).
2. Complete the anonymous online evaluation form for each attended session. Access the evaluation system in the “My Congress” area on the online Congress platform.
3. Download your CME-CPD certificate and retain it for your personal records.

Evaluation data is essential to our statistics and is of considerable help in the choice of future topics and speakers. Your feedback and comments are greatly appreciated.

Conversion of credits

Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME® credit to AMA credit can be found at edhub.ama-assn.org/pages/applications

Live educational activities, occurring outside of Canada, recognised by the UEMS-EACCME® for ECMEC@s are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada.

Information regarding the conversion of EACCME®credits

Credit will be converted based on one (1) hour of participation equalling one credit for all activities. Physicians wishing to convert EACCME® credits to AMA PRA Category 1 Credit™ will be required to access the AMA website at edhub.ama-assn.org/pages/applications to obtain the necessary paperwork and instructions. Physicians and other healthcare professionals will be required to pay a processing fee to the AMA.

For other countries, please contact the relevant national/regional accreditation authority

Subspecialty and international societies

The following societies develop and manage scientific sessions during the EADV Congress 2024 after approval from the EADV Scientific Programming Committee.

Each society has a specific focus on a dermatological topic and offers important insights into the latest developments in that field.

- EHSF - European Hidradenitis Suppurativa Foundation
- ENS - European Nail Society
- ESCAD - European Society for Cosmetics and Aesthetic Dermatology
- ESLD – European Society for Lasers and energy-based devices
- ESDaP – European Society for Dermatology and Psychiatry
- ESDP - European Society for Dermatopathology
- ESPD - European Society for Photodermatology
- ETFAD - European Task Force of Atopic Dermatitis
- Euromelanoma
- EURO-PDT - European Society for Photodynamic Therapy in Dermatology
- EWDVS - European Women Dermatological and Venereological Society
- GA²LEN - Global Allergy and Asthma European Network of Excellence
- GRAPPA - Group for Research and Assessment of Psoriasis and Psoriatic Arthritis
- IADVL – Indian Association of Dermatologists, Venereologists and Leprologists
- IDS - International Dermoscopy Society
- IEC - International Eczema Council
- IPC - International Psoriasis Council
- IPS – International Peeling Society
- ISD - International Society of Dermatology
- MEIDAM - Middle East International Dermatology and Aesthetic Medicine
- PALD - Pan Arab League of Dermatologists
- SPIN - Skin Inflammation & Psoriasis International Network
- SSDDS - Saudi Society of Dermatology and Dermatologic Surgery
- WDS - Women's Dermatologic Society

Scientific programme

The scientific programme has been organised on full or half-day tracks; each track has a specific topic and a structured programme. Entry will be made on a first-come, first-served basis.

Session formats

Sessions of different formats will cover the important fields of dermatology and venereology. Subjects will be treated with different approaches and from different perspectives. The following session types will be scheduled throughout the duration of the Congress and are available to all registered participants.

- Plenary sessions:** Plenary lectures are EADV show-case sessions and include key-note lectures delivered by eminent scientists and doctors.
- Focus on:** These sessions aim at providing comprehensive in-depth coverage of a certain topic in dermatology. The talks will be included in sessions on pathophysiology / epidemiology, clinical challenges, or practical aspects of disease management and will provide the latest cutting-edge information.
- Updates:** These sessions will enable participants to update their knowledge on a specific topic and hear about the most relevant and recent developments, guidelines and practical knowledge from the past year. The talks will summarize the current understanding of the subject, followed by an update on the most recent novelties with their impact on clinical practice.
- Controversies:** Controversial topics in dermatology will be discussed from different points of view in the form of a debate, giving delegates extensive insights into the latest findings.
- Training and education:** These lectures focus on a specific disease and include basic information about epidemiology, pathophysiology, diagnosis, management and prognosis. The target audience of these sessions is young dermatology trainees and residents, as well as dermatologists that want to refresh their basic knowledge on specific topics.
- Free communications:** Authors of the most highly ranked abstracts assessed by a selected panel of abstract reviewers are invited to provide a 10-minute oral presentation.
- Miscellaneous:** The miscellaneous track includes sessions organised and delivered by groups, task forces and committees other than the EADV Committee, such as the Project Proposal Review Committee, the Ethics Committee or the JEADV.

Scientific programme

- **ePoster showcase:** A selection of the best ePosters made by the scientific programming committee will be orally presented in the ePoster Showcase sessions. In addition to submitting their ePosters, the authors will have the possibility to present their findings to the audience in the open stage area.
- **Residents track:** A full track will be dedicated to residents on the second part of the congress. Different subjects will be discussed by residents asking questions to the experts, with an interaction with the audience, involving them in the discussion.
- **Subspecialty sessions:** Subspecialty and International Society meetings are scientific sessions developed and managed by the individual societies after approval from the EADV Scientific Programming Committee.
- **EADV Games:** The EADV will host a quiz for residents during the congress, an event which will gather 18 European countries to compete against each other in a thrilling quiz focusing on various Dermatology topics.
- **Workshops*:** Workshops are a great opportunity to immediately implement newly learned skills, to gain practical experience and quickly acquire knowledge on the subject. Workshops also promote interaction between instructors and participants.
- **Allied healthcare professionals workshops:** A dedicated workshop series designed specifically for allied healthcare professionals. On Saturday, we will feature an entire track dedicated to Nurses, offering valuable insights, and opportunities for networking.

* All Workshops require a pre-registration and a pre-payment. Class sizes are limited to 35 places each and registrants are accepted on a first-paid, first-served basis. More info eadv.org/congress/scientific/workshops

Wednesday 25 September 2024

Room D202 8:30 – 11:45

Basics of ultrasound imaging in dermatology

Chair: Fernando Alfageme (ES)

This workshop is designed for dermatologists seeking to incorporate dermatological ultrasound as a diagnostic tool in their practice. Whether you're new to ultrasound or looking to enhance your skills, join this workshop to explore the diverse applications and techniques of ultrasound in dermatology.

Room D203 8:30 – 11:45

Laser treatment for beginners

Chair: Albert Wolkerstorfer (NL)

The main goal of the workshop is to gain essential knowledge about laser dermatology in order to improve outcomes in laser therapy. It will focus on vascular lesions, pigmented lesions, laser endpoints, how to avoid complications, laser assisted drug delivery and ablative and fractional lasers. Each of these topics will be systematically approached by an expert through 1) a short introduction, 2) an overview of available devices, 3) a review of indications, 4) an interactive panel discussion with tips, tricks and pitfalls.

Room D202 14:15 – 17:30

Allergology: Skin environmental induced contact dermatitis

Chair: Ana Maria Gimenez-Arnau (ES)

The workshop will focus on theoretical and practical aspects to correctly diagnose etiologically immunologic cutaneous disorders. These conditions include dermatitis / eczema (contact or atopic) and urticaria (acute or chronic) trigger by environmental stimuli and agents. Its clinical identification would need some specialized complementary tests in order to typify the responsible agent, assess severity, implement correct treatment and also preventive measures. For this is essential a training. How to identify and demonstrate type I and type IV hypersensitivity in cutaneous Immunol allergic diseases and how to make a correct differential diagnosis of inducible chronic urticarias is the main goal of this workshop.

Room D203 14:15 – 17:30

STI diagnosis and treatment

Chair: Georg Stary (AT)

In this interactive workshop, our aim is to let both residents and dermatologists walk away with fresh knowledge and inspiration with regard to the approach of STI. The workshop will consist of presentations with up-to-date knowledge on STI diagnosis and treatment options. Topics include syphilis, other ulcerative STI, and HIV-indicator diseases. Management of infectious diseases more and more calls for knowledge on mechanisms of antimicrobial resistance (AMR) and how to detect AMR in pathogens. Background information on mechanisms of AMR and (molecular) techniques for detection of AMR for practical use will be discussed.

Participants are encouraged to share local guidelines and experience, and individual cases for discussion.

Room D202 8:30 – 11:45

Dermoscopy – practical and conceptual

Chair: Giuseppe Argenziano (IT)

Dermoscopy is commonly used to improve the diagnosis of neoplastic and non-neoplastic disease. This interactive workshop will discuss practical problems of dermoscopy, including applications beyond its traditional use in pigmented neoplastic lesions.

Room D203 8:30 – 11:45

Medical photography in dermatology

Chair: Paola Pasquali (ES)

Medical photography is a non-invasive imaging technique that is used for recording ailments, make diagnosis, monitoring, get second opinions, indicate surgical site, among many uses. The following workshop is aimed at familiarizing participants in medical photography: what makes it similar to other uses of photography, what makes it different.

Room D203 14:15 – 17:30

Playing with AI in dermatology

Chair: Harald Kittler (AT)

This workshop offers an exploration into the innovative intersection of Artificial Intelligence (AI) and Dermatology. You will explore the potential of AI in various aspects, from diagnostics to treatment strategies. Gain insights into the latest advancements, methodologies, and practical applications in field. Participants will discover how AI technologies can increase clinical decision-making, optimise workflow efficiencies, and enhance patient care. Additionally, discussions will cover the advantages and disadvantages of integrating AI into dermatological practices.

Room D202 14:15 – 17:30

Chemical peelings

Chairs: Fotini Bageorgou (GR), Marina Landau (IL)

Designed for dermatologists seeking to elevate their proficiency in techniques, the Chemical Peeling workshop will cover peel types, patient selection, application methods, safety measures, and treatment strategies. This workshop offers a unique opportunity for skill enhancement in the field.

Room D202 8:30 – 11:45

Phlebology for beginners

Chair: Felizitas Pannier (DE)

The participants will be introduced to the main principles of phlebology. To start, the following topics will be explained and discussed:

- The anatomy and physiology of the lower limbs
- The diagnostics and investigations used by phlebologists
- The therapy of varicose veins according to the newest guidelines, including sclerotherapy

Afterwards, participants will be divided in 4 rotating groups for hand-on learning.

In addition, there will be time to discuss questions around indications, techniques, side effects and results of sclerotherapy.

Room D203 8:30 – 11:45

Dermal fillers

Chair: Bertrand Richert (BE)

The Dermal Fillers workshop is designed for dermatologists willing to improve their skills in dermal filler procedures. This workshop will cover the principles of facial anatomy, injection techniques, product selection, safety considerations, advanced applications of dermal fillers and will especially focus on potential side effects and how to deal with them. Videos of injecting procedures will be displayed.

Room D202 14:15 – 17:30

Conquer your audience: perfect your presentation skills

Chairs: Christa de Cuyper (BE), Paola Pasquali (ES)

Enhance your presentation skills with our interactive workshop. Participants will deliver a presentation of up to 7 minutes, which will be evaluated by a panel of four experts. Each presentation will be scored on scientific content, graphical quality, message delivery, and overall impression, providing valuable feedback to help you master the art of public speaking.

Room D203 14:15 – 17:30

Use of botulinum toxin in cosmetic and medical dermatology

Chair: Samira Baharlou (BE)

The workshop will focus on the practice of use of botulinum toxin in a dermatologist office.

This workshop gives theory behind the use of botulinum toxin for aesthetic and medical dermatological indications. The hands-on part to study the practical use of toxins and to learn where to place the injections points for successful treatment outcomes.

Practical workshops

Saturday 28 September 2024

Room D202 8:30 – 11:45

Surgery – Basic

Chair: Victoria Marmgren (SE)

In the first part of the workshop, we will learn about preparation for surgical procedures, facial anatomy, anesthesia, instruments and suturing. The second part will focus on exercising punch biopsy, ellipse excision and different suture techniques. At the end, basic principles of flaps and grafts will be reviewed shortly. All aspects will be discussed and illustrated with pictures, followed by hands-on training in groups. During the training, live video will be used to visualize anesthetic procedures, use of instruments and suturing.

A quiz will be held at the end of workshop.

Room D203 8:30 – 11:45

Get your papers published: tips and tricks from the editors

Chair: Carle Paul (FR)

This workshop is designed to clarify the process of academic publishing in dermatology. Gain insider knowledge and practical advice from experienced editors to boost your chances of getting published. It is intended to be a highly interactive session, so participants are encouraged to bring their own research projects or article drafts.

Room D202 14:15 – 17:30

Surgery – Intermediate

Chair: Victoria Marmgren (SE)

In the first part of the workshop, we will interactively discuss details and pitfalls in preparation of surgical procedures, facial anatomy, anaesthesia, instruments and suturing. This will be followed by hands-on training of some special aspects of suturing and biopsy. The second part will focus on the principles of flaps and grafts. The different techniques will be discussed and illustrated with lots of pictures, followed by hands-on training in groups. During the training, live video will be used to visualize the procedures. A quiz will be held at the end of workshop.

Room D203 14:15 – 17:30

Wound healing

Chair: Elena Conde Montero (ES)

Discover the latest in leg ulcer diagnosis and treatment through interactive group sessions. You'll learn holistic wound assessment, considering not just the wound but also the surrounding skin and patient health. Gain practical experience with diagnostic tools, including performing ankle-brachial index measurements yourself. We'll provide practical tips for achieving systematic and efficient differential diagnoses, illustrated with rich visuals. Explore the benefits and applications of compression therapy for various leg ulcers, understand the range of commercially available wound dressings, and learn about their components and indications. Additionally, delve into the concepts of wound infection continuum and antimicrobial stewardship, and discover the technique of punch grafting for promoting epithelialization.

Patient organisations area

EADV actively works to develop a synergic action between the patient community and key healthcare providers.

We invite all Congress attendees to visit the Patient Organisations Area taking place from 25 to 28 September 2024 in the Hall 2. In this dedicated area you have the opportunity to meet with leaders of the represented patient organisations, discuss activities of common interest, explore different perspectives, needs and roles and how to fit them into the larger world of European dermatology.

We acknowledge and thank the below patient organisations for their commitment and involvement during this year's Congress:

The Scientific Session rooms for the EADV Congress are located in the Europe Complex (Hall 3 and Hall 7) and in the Congress Centre (Auditorium, Elicium, Emerald, Forum, E and G Rooms). Please refer to the [floor plans](#) for orientation.

Seating is regulated on a first-come, first-served basis. We recommend you go to the session room well in advance of the session to ensure your place. Due to safety regulations, the organisers will close the access to the session if all seats are occupied. Delegates are not permitted to stand in the aisles of the session rooms.

In the event of high attendance, the following rooms will be available to accommodate additional participants:

- Ruby Lounge → overflow for E102
- E105 → overflow for E103-E104
- E106 → overflow for E107-E108
- G107 → overflow for G102-G103
- G106 → overflow for G104-G1050

Recording during scientific sessions

The use of mobile phones as well as audio and video recording devices are strictly prohibited within the scientific session rooms. Please ensure that you have your mobile phone switched off when attending a session. Photography is not permitted.

Certificates and accreditation

All registered participants will be able to download their certificates online based on their level of engagement:

- A **Certificate of Attendance** is available for all registered participants who have a valid registration badge and attended at least 1 session.
- A **CME-CPD Certificate** is available for all participants who actively attended scientific sessions, have their badge scanned and completed the online evaluation forms.
- An **ePoster Certificate** is available for all leading ePoster authors.
- An **Oral presentation Certificate** is available for all presenters of an abstract accepted for an oral presentation.
- A **Speaker presentation Certificate** is available for all presenters who have delivered a lecture in a scientific session
- A **Workshop Certificate** is available for all for all Workshop participants.

The certificates are not sent out automatically. They can be downloaded from our platform by entering the [email address and password used during the registration process](#) OR the [EADV member log-in details](#) (if a EADV member).

General information

Abstracts and ePosters

Accepted abstracts will be made available on our website eadv.org/scientific/abstract-books/

Abstracts selected for ePosters will be published as electronic posters during the Congress and will be available for viewing in the ePoster area, located in the Hall 3.

30 big screens are provided and configured exclusively to display the ePosters.

The ePosters can be viewed sequentially by number, submission topic or searched individually by title, key word, or author.

The ePoster area will be open as follows:

- Wednesday 25 September 07:30 – 18.30
- Thursday 26 September 07:30 – 18.30
- Friday 27 September 07:30 – 18.30
- Saturday 28 September 07:30 – 12.00

Exhibition hall

The Congress will host an exhibition hall of more than 15.000sqm, located in Hall 1 of the RAI Amsterdam. The exhibition halls can be accessed from Entrance K, Hall 2, Hall 3, and Hall 6.

Please note that the exhibition hall is open to Healthcare Professionals (HCPs) only, as prescription medical products will be advertised.

According to the European Union Directive 2001/83/EC (and amended version 2010/84/EU), the promotion of prescription-only medicines should be directed solely at Healthcare Professionals or any person who is authorised to prescribe or handle them.

The National Dutch laws, codes and regulations are applied during the EADV Congress in Amsterdam. Therefore, access to the Exhibition halls, Satellite Symposia and Industry expert hub sessions dealing with development, research or other related to prescription medicine will be restricted to Healthcare Professionals only.

The exhibition hall will be open during the following hours:

- Wednesday 25 September 12:00 – 17:30
- Thursday 26 September 09:00 – 17:30
- Friday 27 September 09:00 – 17:30
- Saturday 28 September 09:00 – 12:00

Exhibitors can enter the exhibition hall 1 hour before and after the opening hours except for the closing time of the last day.

Opening plenary session and networking symposium

Join us to celebrate the start of the 2024 EADV Congress and participate in the first plenary lecture of this year's edition

Prof. Martin Röcken will officially inaugurate the 2024 EADV Congress followed by the keynote speaker Dr. Bertrand Piccard, a modern-day pioneer in aviation exploration and innovation who achieved a record-breaking around-the-world balloon journey in 1999. He will discuss the human impact on the climate and suggest actionable steps we can take in our personal lives to protect our planet

Following the enriching session, starting at 19:00, we invite you to join us for a networking reception in the Auditorium Lounge.

Let's celebrate the beginning of an incredible congress together.

Privacy

Use of private data

The data made available through the Registration Portal for Congresses and Symposia are gathered and treated by the EADV in compliance with the Swiss regulation on data protection and the General Data Protection Regulation. We advise you to read full EADV Privacy Policy on eadv.org/privacy-policy.

Transferring the data to the industry session organiser

During the EADV Congress you have the right to transfer the data collected by EADV to another controller (“the Industry session organiser”, “Industry”). It might happen through scanning a badge, QR code or other means. Each participant shall consider that by accepting any scanning of the badge, QR code or other means at any industry session at the Congress, the participant gives authorization to the EADV to transfer the data of the participant to the Industry.

The EADV is obliged to make this process possible but does not take any responsibility for what happens with the data after it is transferred to the Industry session organiser. We advise to make sure that Industry presents Privacy Policy and read it carefully. It may occur that purposes described by the Industry Exhibitor might include the promotion of pharmaceutical products and similar.

Transfer of the data from the EADV to exhibiting Industry does not mean the removal of original data from EADV. If you wish for the data to be removed or have any request or questions, please contact us at any time by writing to eadvoffice@eadv.org.

Third-party registration

The EADV does not officially support or authorize any third-party organization that creates registrations for individuals or groups. We strongly advise to register accordingly to official fees and only on EADV official websites.

Liability disclaimer

The Organisers cannot be held liable for any hindrance or disruption to the EADV Congress arising from political, social or economic events or any other unforeseen incidents beyond their control. The Organisers will accept no liability for any personal injuries sustained or for loss or damage to property belonging to Symposium participants, either during or as a result of the Congress or during all tours and events. Registration of a participant entails acceptance of these conditions.

To attend the Congress for more than one day, a Full Ticket valid for the whole duration of the event needs to be purchased. Transportation pass and Virtual Access after the event are not included.

** IMPORTANT: Industry Session organisers could limit participation to certain representative groups independently from EADV recommendations if deemed imperative to the achievement of the intended purpose of the industry session. The organising company reserved the right to refuse single categories, in particular if not adequately related to the objective and purpose of the session.*

Registration

Name badge

Registered participants are invited to print out their badge at the self-printing machines on arrival to the Registration area. The name badge is the official EADV Congress identification document and should be worn at all times in order to gain entry to the various Congress areas.

The name badge is your ticket for booked activities and sessions. Admission to other areas of the venue is not permitted without badge identification.

The badge includes a QR-code containing your full address and email. It is the participant's decision to disclose these details to the Industry Session's organisers with a scanner.

Press information for journalists and media representatives

Journalists who are working for and representing recognised news organisations are encouraged to attend the Congress as Press. To register, journalists must complete the online application, upload a valid press card, and confirm adherence to the Embargo policy.

All registered Press members must adhere to the EADV Press & Media Guidelines, Embargo Policy and Filming/Photography/Recording Policy for Professionals. Registered Press can access all scientific sessions, but not the Exhibition Area, Satellite Symposia or Industry Expert Hub sessions. Only specialised press representatives can access the Exhibition area.

For further information about registration, the EADV Press and Media Guidelines and the Embargo Policy, please visit the press page on our website eadv.org/congress/press.

Healthcare professional information and definition

Access to the different areas and sessions of the Congress depends on the status. Please read the description below to ensure you/your delegates comply with the regulations in place. EADV Members are not designated as Healthcare Professionals by default. Please attribute the correct status (HCP or Non-HCP) during registration.

Definition

A multidisciplinary audience will attend the EADV Congress, and the EADV will assign different classes to healthcare professionals (HCP) and non-Healthcare Professionals (non-HCP) to ensure compliance with these regulations.

Chapter 3 of the Dutch CGR code defines HCPs as follows:

"3.1 In the purpose of this Code of Conduct, the following terms shall bear the following meaning: healthcare professionals: persons qualified to prescribe or supply prescription-only medicinal products."

Further explanation is provided in The General information about organising scientific meetings and Frequently Asked Questions from the CGR (Dutch Foundation for the Code for Pharmaceutical Advertising (to be referred to as the general information document from here on out) ([20170214 CGR informatie congresorganisaties](#)), where it states (at section 2 a, page 2) that:

"In the Netherlands the group of healthcare professionals comprises: physicians, physicians who are being trained to become a specialist ('artsen in opleiding'), pharmacists, pharmacist's assistants, obstetricians, dentists, physician assistants, nurse practitioners and specialised nurses."

Dutch nurses, in particular

It further clarifies that:

"Specialised nurses (limited to the lung, diabetes and oncology areas) only have independent prescription authority if they have completed a specific training programme for this purpose. The completion of this training is entered in the BIG register and so can be checked by anyone. This means that all of the other healthcare providers, such as regular nurses, dieticians, dental hygienists or supportive GP practitioners ('praktijkondersteuners'), are not healthcare professionals and so – just like patients – belong to the 'general public'. This group will be referred to below as 'non-healthcare professionals'."

In terms of specialised nurses, the explanatory notes to the CGR code ([20200701 Explanatory Notes CGR per 20200701](#)) provide a specific list to be taken into consideration:

3.1.d Definition of "healthcare professional"

.... pharmacist's assistants and nurses with the additional BIG registrations: Specialised nurses (gespecialiseerd verpleegkundigen):

- *Diabetes nurses*
- *Pulmonary care nurses*
- *Oncology nurses*

Specialised nurses may only be considered as healthcare professionals if their BIG registration states that they have prescription authority. Nurse specialists (NS) (verpleegkundig specialisten):

- *NS providing general healthcare*
- *NS providing mental healthcare"*

Healthcare professional information and definition

Residents

Lastly, the explanatory notes state (at page 3) that:

“Physicians in training to become a specialist (artsen in opleiding) are also considered as healthcare professionals within the meaning of the Code of Conduct. Medical students are not considered healthcare professional (see Newsletter 2006/4).”

Other Categories

The general information document (sections 2d and e, page 3) goes on to clarify that industry employees and specialised journalists can be exposed to promotional content. Yet patients, patient representatives, and regular press or specialised journalists who target the general public will still be considered non-HCPs and should not be exposed to promotional content.

STUDENTS are NOT considered as Healthcare Professionals under the current guidelines and will be automatically classified as NON-HEALTHCARE PROFESSIONALS.
