

# EADV MASTERCLASS

## Infectious diseases in dermatology: New challenges and paradigms

Residents Course | 24 May 2025 | Prague, Czech Republic

### Description

The programme of this interactive course provides residents with a comprehensive update on cutaneous infections and sexually transmitted diseases, which resident dermatologists will be able to incorporate into their practice.

This course is designed to enhance the knowledge and improve the diagnostic and therapeutic skills of dermatologists in managing certain cutaneous infection-related disorders.

The aim is not to cover all infectious dermatoses, but rather to focus on new concepts or emerging challenges in cutaneous infections that could influence daily practice.

Special attention will be given to infectious pathologies remarkable for their pathogenesis (toxin phenomena), the evolution of their resistance to anti-infectives, their epidemiological significance in public health worldwide, in carcinogenesis, or their importance in our practice in specific at-risk populations. Participants will gain comprehensive knowledge of pathogenesis, diagnostic methods, treatment strategies, and emerging trends in infectious dermatology.

A panel of experts will address the clinical spectrum of diseases caused by different infectious agents and provide updated information on sampling methods and evaluation of test results. The programme will also include therapeutic options with tips and tricks to improve clinical response and therapeutic outcomes in specific patient communities.

By the end of the course, resident dermatologists will have a deeper understanding of how to diagnose and manage a wide range of infectious skin disorders.

The Masterclass will also serve as an excellent opportunity for knowledge sharing and exchanging experiences from daily practice. Meeting colleagues from across Europe in an open atmosphere will provide a unique opportunity for networking and engaging with the EADV nurse community.

### Learning Objectives

1. A better understanding of diagnostic advances in infectious diseases with skin involvement
2. A better understanding of clinical presentation and issues in infectious diseases with skin involvement
3. A better understanding of new therapeutic concept and approaches in infectious diseases with skin involvement

## Faculty

Chair: Marie Aleth Richard

Speakers: Ditte Marie Saunte, Nicolas Dupin, Romain Blaizot, Elena Rossi, Sébastien Fouéré, Jana Hercogova, Marie Aleth Richard/Florent Amatore, Federica Dassoni

## Programme

**Saturday, 24 May 2025**

---

- 07.30-08.30 Participant Registration and Check-in
- 08.30-09:00 Viral Skin diseases  
*Nicolas Dupin*
- 09.00-09.30 New concepts and new challenges in infectious diseases in developing countries, in migrants and in homeless (including leprosy)  
*Romain Blaizot*
- 09.30-10.00 New concepts and new challenges in scabies and other parasitic infections: epidemiological and health risks, therapeutic including resistance to antiparasitics  
*Romain Blaizot*
- 10.00-10.30 New concepts and new challenges in tropical diseases on returning from a tourist trip  
*Romain Blaizot*
- 10.30-11.00 **Coffee Break**
- 11.00-11.30 New concepts and new challenges in cutaneous Staphylococcal and Streptococcal infections: toxin versus bacterial agents, which threat? How to anticipate and prevent them? The concept of epidemiologic follow-up  
*Jana Hercogova*
- 11.30-12.00 New concepts and new challenges in life threatening bacterial infections: Cellulitis, Necrotizing Fasciitis  
*Jana Hercogova*
- 12.00-12.30 New TSIs and re-emerging old diseases: Kaposi, Monkey pox, Syphilis, or Fabre Lymphogranulomatosis. How to diagnose, how to prevent, how to monitor in an epidemiologic target  
*Nicolas Dupin*
- 13.00-14.00 **Lunch break**
- 14.00-14.30 New concepts and new challenges in HPV associated skin diseases: From new virus induced cancers to vaccination prevention  
*Sébastien Fouéré*
- 14.30-15.00 New concepts and new challenges in the diagnosis management of dermatomycosis and onychomycosis (disease burden, diagnosis of dermatomycosis and onychomycosis including emerging species like *Trychophyton indotinae*, antifungal susceptibility testing- resistance, treatment including off label dosing and various dosage regimens)  
*Ditte Marie Saunte*
- 15.00-15.30 Practical considerations for preparation and management or infections risk in dermato-surgery and aesthetic procedures  
*Elena Rossi*
- 15.30-16.00 Infectious risks and opportunistic infections in immunocompromised patients (transplantation), in patients under biologics  
*Marie Aleth Richard, Florent Amatore*

- 16.00-16.30 Coffee Break  
16.30-17.00 Tuberculosis and Atypical Mycobacterial Infections  
*Federica Dassoni*  
17.00-17.30 Case-Based Quiz  
*All Speakers, All Participants*  
17:30-19:30 Networking cocktail with speakers and participants

*The programme might be subject to changes.*
