

Scientific programme

The scientific programme has been organised on full or half-day tracks; each track has a specific topic and a structured programme. Entry will be made on a first-come, first-served basis.

Session formats

Sessions of different formats will cover the important fields of dermatology and venereology. Subjects will be treated with different approaches and from different perspectives. The following session types will be scheduled throughout the duration of the Congress and are available to all registered participants.

- **Plenary sessions:** Plenary lectures are EADV show-case sessions and include key-note lectures delivered by eminent scientists and doctors.
- **Focus on:** These sessions aim at providing comprehensive in-depth coverage of a certain topic in dermatology. The talks will be included in sessions on pathophysiology / epidemiology, clinical challenges, or practical aspects of disease management and will provide the latest cutting-edge information.
- **Updates:** These sessions will enable participants to update their knowledge on a specific topic and hear about the most relevant and recent developments, guidelines and practical knowledge from the past year. The talks will summarize the current understanding of the subject, followed by an update on the most recent novelties with their impact on clinical practice.
- **Controversies:** Controversial topics in dermatology will be discussed from different points of view in the form of a debate, giving delegates extensive insights into the latest findings.
- **Training and education:** These lectures focus on a specific disease and include basic information about epidemiology, pathophysiology, diagnosis, management and prognosis. The target audience of these sessions is young dermatology trainees and residents, as well as dermatologists that want to refresh their basic knowledge on specific topics.
- **Free communications:** Authors of the most highly ranked abstracts assessed by a selected panel of abstract reviewers are invited to provide a 10-minute oral presentation.
- **Miscellaneous:** The miscellaneous track includes sessions organised and delivered by groups, task forces and committees other than the EADV Committee, such as the Project Proposal Review Committee, the Ethics Committee or the JEADV.

Scientific programme

- **ePoster showcase:** A selection of the best ePosters made by the scientific programming committee will be orally presented in the ePoster Showcase sessions. In addition to submitting their ePosters, the authors will have the possibility to present their findings to the audience in the open stage area.
- **Subspecialty sessions:** Subspecialty and International Society meetings are scientific sessions developed and managed by the individual societies after approval from the EADV Scientific Programming Committee.
- **EADV Games:** The EADV will host a quiz for residents during the congress, an event which will gather 18 European countries to compete against each other in a thrilling quiz focusing on various Dermatology topics.
- **Workshops*:** Workshops are a great opportunity to immediately implement newly learned skills, to gain practical experience and quickly acquire knowledge on the subject. Workshops also promote interaction between instructors and participants.
- **Allied healthcare professionals workshops:** A dedicated workshop series designed specifically for allied healthcare professionals. On Saturday, we will feature an entire track dedicated to Nurses, offering valuable insights, and opportunities for networking.

* All Workshops require a pre-registration and a pre-payment. Class sizes are limited to 35 places each and registrants are accepted on a first-paid, first-served basis. More info eadv.org/congress/scientific/workshops
