

ANNUAL REPORT 2025

MESSAGE FROM THE PRESIDENT

The year 2025 has been one of consolidation, progress and renewed ambition for the European Academy of Dermatology and Venereology. As President of the EADV, I am pleased to reflect on a year in which the Academy continued to strengthen its scientific foundation, expand its international reach and reaffirm its responsibility to EADV members, our patients and society at large.

EADV's continued growth is a testament to the relevance and credibility of our mission. With more than 13'000 members from 132 countries, the Academy has further evolved into a truly global community, united by a shared commitment to excellence in dermatology and venereology. This diversity enriches our scientific dialogue and reinforces our role as a leading European voice with worldwide impact.

Scientific education remains at the core of our activities. In 2025, our Congress and Symposium continued to attract record engagement, offering high-quality, evidence-based programmes that reflect both the depth and breadth of our specialty. The success of the Spring Symposium in Prague and the outstanding Paris Congress illustrate the vitality of our scientific events and the dedication of our faculty, committees and partners. At the same time, the restructuring of educational delivery and the expansion of accredited digital learning have strengthened access, consistency and long-term sustainability.

Our publishing portfolio has continued to flourish. The JEADV maintains its position as a leading international journal, while the JEACP reached an important milestone with the achievement of its first Impact Factor. Together with the growth of additional educational formats, including podcasts and digital resources, these developments underline EADV's commitment to disseminating knowledge through diverse and innovative channels.

Beyond education and science, 2025 marked important progress in advocacy, sustainability and global responsibility. The Academy strengthened its engagement with European institutions, addressing key public health priorities such as skin cancer prevention, sunbed regulation, women's health and the systemic burden of skin disease. In parallel, the integration of sustainability into Congress planning and the publication of climate-focused guidance reflect our determination to align dermatological practice with broader societal and environmental responsibilities.

EADV's collaborative spirit has also been reinforced through new and renewed partnerships with sister societies across Europe and beyond, as well as through continued support for charitable and educational initiatives in regions with limited access to dermatological care and training. These efforts reflect our belief that advancing dermatology must go hand in hand with promoting equity and global solidarity.

I would like to express my sincere gratitude to the Executive Committee, Board members, committees, task forces, editors, working groups and the EADV Office for their professionalism, dedication and tireless commitment. Above all, I thank our members for their trust, engagement and continued support. Your active participation is the driving force behind the Academy's achievements.

As we look ahead, EADV remains committed to innovation, inclusiveness and excellence. Together, we will continue to strengthen the Academy's role as a trusted scientific authority and a forward-looking professional home for dermatologists and venereologists worldwide.

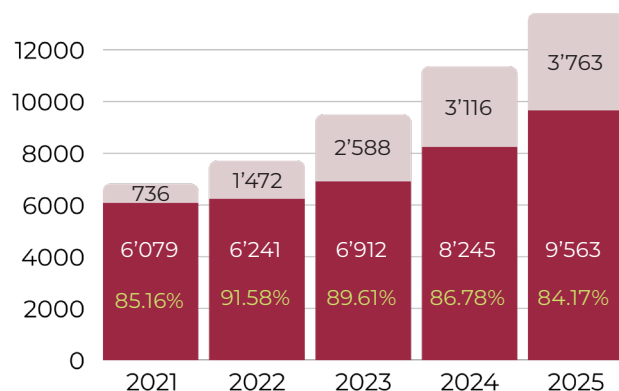

Prof Branka Marinović
EADV President
2024-2026

MEMBERSHIP AFFAIRS

The EADV Membership for 2025 concluded with a total of 13'326 members across 132 countries and regions. Since 2022, the Academy has seen consistent and significant growth: a 13% increase in 2022, followed by a remarkable 23% rise in 2023, an outstanding 20% growth in 2024, and a further impressive 17% increase in 2025.

EADV Symposium 2025 - Prague, 22-24 May

The 3-day scientific programme, accredited by the UEMS-EACCME (European Accreditation Council for Continuing Medical Education) with a maximum of 14.5 European CME credits (ECMEC®), had over 25 scientific sessions and more than 90 top-level speakers.

The plenary lecture focused on the “The many faces of full-face transplantation” and was delivered by Prof. Bohdan Pomahac, from Yale University.

HONOURS & AWARDS

EADV scholarships continue to offer young dermatologists, venereologists, trainees, and researchers a unique opportunity to engage with the latest developments in their field. By attending EADV annual events, recipients gain access to cutting-edge knowledge, valuable networking, and exposure to emerging trends in dermatology and venereology.

In 2025, the EADV awarded scholarships at both the Prague and Paris events, recognising outstanding applicants through a variety of programmes, including the Michael Hornstein, John Stratigos, and Imrich Sarkany Memorial Scholarships, as well as specialised awards such as the Best Researcher Award and multiple partner society scholarships.

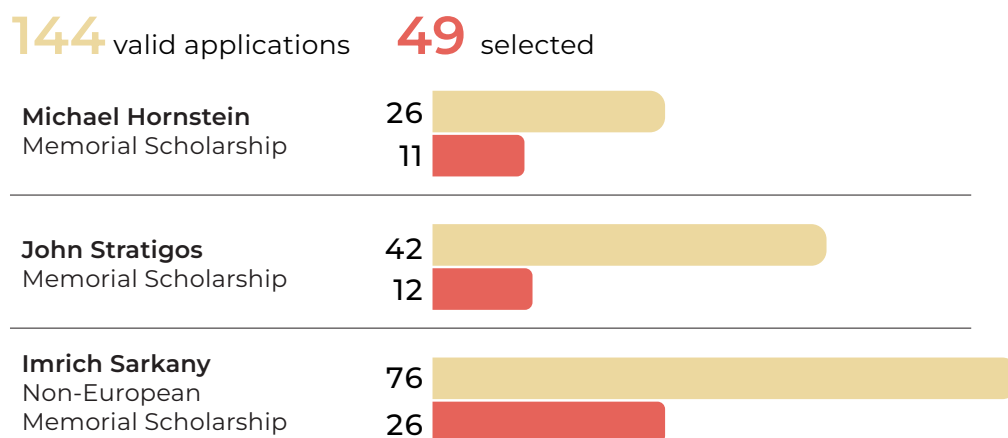

These opportunities provide recipients not only with professional growth but also the tools to enhance patient care, contribute to research, and further advance the field globally.

Through these scholarships and grants, EADV continues to invest in the careers of promising professionals, fostering expertise, innovation, and perseverance that will shape the future of dermatology and venereology.

Parasitologic Dermatology	Antoine Bertolotti	03-05 Sep	Antwerpen, Belgium	25
Peelings from A-Z	Fotini Bageorgou	26-28 Sep	Santorini, Greece	20
Leg ulcers: Hands-on training	Elena Conde Montero, Catherine van Montfrans, Justin Gabriel Schlager	15-17 Oct	Madrid, Spain	35
Genital HPV from Paediatric to Mature Age	Marco Cusini, Mihael Skerlev	27-29 Oct	Turin, Italy	30
The Art of Injectables	Brunilda Bardhi	06-08 Nov	Tirana, Albania	20
Advanced STIs	Henry de Vries	19-21 Nov	Amsterdam, Netherlands	25
Wound Healing	Marco Romanelli	02-04 Dec	Pisa, Italy	25
Autoimmune diseases in dermatology	Jean-David Bouaziz	11-12 Dec	Paris, France	25

ONLINE COURSES ADDED IN 2025

Course name	Duration	CME
Leg ulcers	5.00 h	5
Genital HPV: From paediatric to mature age	4.30 h	5
Skin pigmentation in Universal dermatology	10.30 h	10.5
Infectious diseases in dermatology: New challenges and paradigms	6.30 h	6.5
Cutaneous lymphoma	11.00 h	11
Mycology	11.00 h	11

FUNDING OPPORTUNITIES

Supporting research and professional development remains a core mission of the European Academy of Dermatology and Venereology. Through a diverse portfolio of funding programmes, the Academy continues to invest in scientific innovation, specialist training and international collaboration in dermatology and venereology.

In 2025, EADV supported a wide range of initiatives, including project proposal grants, fellowships and collaborative initiatives, providing opportunities for both early-career and established investigators.

These programmes enable dermatologists and researchers to advance their expertise, foster cross-border collaboration and ultimately contribute to improving patient care.

EADV–FOREUM Joint Action

EADV introduced a new funding initiative in collaboration with the Foundation for Research in Rheumatology (FOREUM), aimed at fostering cooperation between dermatologists and rheumatologists working on diseases with overlapping clinical and pathogenic mechanisms.

This new initiative marks an important step in strengthening cross-disciplinary research collaborations and expanding the impact of

dermatological research within the broader field of immune-mediated diseases.

The grant provides up to two years of funding to independent clinicians with a demonstrated track record in dermatologic and rheumatic disease research. A key requirement is that the proposed collaboration offers clear scientific synergy and a distinct advantage over separate, discipline-specific projects.

■ Projects selected for funding in 2025:

Patricia Garbayo-Salmons

Parc Taulí Research and Innovation Institute Foundation, Sabadell, Spain

Hidradenitis Suppurativa and Spondyloarthritis: Yielding New Related Genetic Insights Through a Targeted Sequencing Study (SYNERGY)

Benjamin Klein

Signatures Reflective of Treatment Response in Dermatomyositis Skin Disease (SIGRES-DM)

Project Proposal

The EADV Project Proposal programme supports innovative research and educational initiatives that advance knowledge and clinical practice in dermatology and venereology.

These grants enable investigators across Europe to develop collaborative projects addressing key scientific and clinical challenges in the field.

Home institution: Oxford University Hospitals NHS Trust, United Kingdom

Host institution: Erasmus University Medical Center, Rotterdam, Netherlands

GLOBAL HEALTH FELLOWSHIP

The Global Health Fellowship Programme supports dermatologists who wish to contribute to improving dermatological care and education in underserved regions. Through these fellowships, participants collaborate with local healthcare professionals, share expertise and gain valuable experience working in different healthcare environments.

In 2025, the programme expanded further with the addition of Bandung, West Java, Indonesia, as a new fellowship location. This new site strengthens the Academy's commitment to global dermatology education and international collaboration.

■ Global Health Fellowship recipients 2025:

Rebecca Donadoni

Home institution: University of Genoa – Department of Health Sciences (DISSAL), Italy

Host institution: Regional Dermatology Training Centre, Moshi, Tanzania

Jingyuan Xu

Home institution: Countess of Chester NHS Foundation Trust, United Kingdom

Host institution: Hasan Sadikin General Hospital, Bandung, Indonesia

SOCIAL RESPONSIBILITY

In 2025, the EADV continued its commitment to reducing inequalities in patient care by supporting education and resources where they are most needed.

Regional Dermatology Training Centre

MOSHI, TANZANIA

Through its annual donation to the Regional Dermatology Training Centre (RDTC) in Moshi, Tanzania, the EADV helped strengthen dermatological expertise across Africa.

The centre treated over 16'600 patients and provided outreach services to nearly 3'000 people with albinism. It also trained 41 Master's in Medicine students and welcomed a new cohort to the Advanced Diploma programme, delivering clinical care, specialist training, continuing medical education, and initiatives in sunscreen production and skin cancer prevention.

JOURNALS

JEADV

The year 2025 marked a milestone in the continued growth and strengthening of JEADV. The Editorial Team expanded significantly with the appointment of 92 Junior Editors, reflecting the journal's commitment to nurturing the next generation of academic leaders in dermatology.

Together, the team has driven progress, implementing strategic initiatives that further elevate scientific excellence, streamline editorial processes, and deepen engagement with authors, reviewers, and readers worldwide.

JEADV's progress is reflected in its 2024 Impact Factor of 8, placing the journal among the **sixth highest-ranked peer-reviewed dermatology journals worldwide** and confirming its role as a central forum for international dermatological research.

JEADV Editorial Board Meeting - EADV Congress 2025, Paris

Renovation and Innovation

As part of the JEADV strategic plan, several targeted developments were introduced to enhance the journal's structure, accessibility, and visibility.

These initiatives include:

- The appointment of **92 Junior Editors** in January 2025, reinforcing editorial capacity and academic engagement.
- The launch of the **Patient's Voice** section, presenting first-hand patient accounts of living with skin disease and linking clinical research directly with personal experience.
- The launch of the **Images in Dermatology** section, showcasing the best clinical images in dermatology.
- The adoption of **Plain Language Summaries** for all Original Articles, ensuring that research findings are accessible to a broader readership.
- The Call for Papers for a **Personalised Medicine in Dermatology Special Issue**, scheduled to be published in March 2026.
- A **rapid peer review process** for high-priority manuscripts, including clinical trials and time-sensitive research.
- The establishment of a dedicated **Graphical Abstract collection** on the EADV website, offering readers a concise visual overview of published research.
- The restructuring of the **Guidelines and Position Statements collection** on the EADV website, providing users with smoother and more intuitive access to the published clinical guidelines.
- The introduction of the **JEADV Voice of the Authors** video series, providing authors with a platform to present and contextualise their work online.
- A new **Research Exchange Submission Platform** to enhance authors' experience in submitting their manuscripts to the JEADV.

JOURNALS

JEADV Clinical Practice

Since its launch in 2022, JEADV Clinical Practice (JEACP) has continued to strengthen its presence and relevance in the dermatology community. Under the dedicated leadership of Dr. Antonio Torrelo, the journal attracted a growing global audience and earned the confidence of authors who increasingly view JEACP as a trusted venue for their work.

The momentum achieved in 2025 reflects a year marked by community engagement, expanding submissions, and important milestones for the journal's development.

In 2025, **JEACP received 1'000+ manuscripts**, 60% of which were original submissions. Notably, **70%** of these were **direct submissions**, confirming that an increasing number of authors now choose JEACP as their first option.

The journal published **250+ articles** from contributors representing **50+ countries**, and readership continued to expand with more than **400'000 full-article views** in 2025 alone.

A defining moment came with the journal's **first Impact Factor**, an important milestone in the journal's early trajectory.

Publications in 2025

In addition to its four regular issues, JEACP published a new **Special Issue** on Cutaneous Mosaicism and its first **Supplement issue**, further establishing JEACP as a reliable and visible platform for academic and industry partners.

Throughout the year, the journal introduced several initiatives aimed at enhancing article visibility and reader engagement. More articles now include **graphical abstracts**, and all visuals are featured in a dedicated online gallery. The introduction of **Editor's Picks**, available in both text and video formats and shared across social media, provided an additional avenue to highlight high-value content.

EDITOR-IN-CHIEF

During the EADV Congress in Paris, Dr. Antonio Torreló was confirmed for a second mandate, ensuring stable and experienced leadership for the next five years.

Together with the editorial team, now comprising one Associate Editor and seven Section Editors, he will continue working to strengthen JEACP's quality, visibility, and impact year by year.

COMMUNICATIONS & MEDIA

In 2025, the Communications and Marketing team sought to enhance EADV's brand positioning, expand EADV's digital presence and optimise engagement with key stakeholders.

Through a structured and data-driven approach, a successful editorial plan was organised to promote flagship events, reinforce online visibility, and strengthened the leading role of the EADV in dermatology and venereology.

Digital presence

EADV's digital engagement saw substantial growth in 2025, with an **overall increase of 20% in social media presence** compared to the previous year. The social media following surpassed **86'400** across four major platforms, reflecting sustained audience interest and strategic content dissemination.

TASK FORCES

EADV task forces are groups of specialists in different fields of dermatology and venereology that bring together a specific set of skills and expertise to enable EADV to influence and advance research and knowledge on subjects with scientific, clinical or educational relevance.

Each task force is focused on a specialty of dermato-venereology and plays a crucial role in fostering and advancing medical and patient education, information, communication on latest advances, cutting-edge studies, discoveries and expert opinion statements.

Task Forces embody EADV's mission to advance care, education, and research in dermatology and venereology by connecting professionals and fostering innovation worldwide.

TASK FORCES INTRODUCED IN 2025

Climate

Cutaneous adverse reactions to drugs and erythema multiforme (CARD-EM)

Geriatric dermatology

Photodermatology

Skin and Pollution

Sports dermatology

Updated Task Force Bylaws

An update of the EADV Task Force Bylaws was voted and approved by the Board during the 68th Board meeting, held at EADV 2025 Congress in Paris.

The new Bylaws, which replaced the former version issued in 2020, have been prepared considering the valuable input, proposals and requests received by TFs during the last years.

These updates were introduced to strengthen the role of TFs as trusted working groups representing EADV in its focus to continued improvement of education, research and awareness:

1. Introduction of TF initiated surveys, which can be addressed to EADV members and must carry a clear goal and provide practical value to EADV mission and strategy.
2. The mandatory requirement, for TF Chairs and Co-Chairs, to become and remain active EADV members throughout their term.

3. The requirement that 80% of TF Members must be members of the EADV, active and in good standing (for each TF). A limit of maximum 20% of non-members is set for each task force.
4. The mandatory requirement, for TF members, Chairs and Co-Chairs, to submit descriptions of all personal and professional circumstances that might create a conflict of interest.

ADVOCACY

In 2025, EADV launched a refreshed advocacy strategy, in collaboration with Acumen, EADV's Public Affairs Agency.

Throughout the year, EADV actively engaged EU policymakers and associations, reinforcing the role of the Academy in shaping policies on dermato-venereology prevention and patient

care. Against the backdrop of last year's European elections and a newly appointed European Commission, EADV identified **three strategic priorities**:

Strengthening **prevention, early detection** and **timely treatment** of skin diseases.

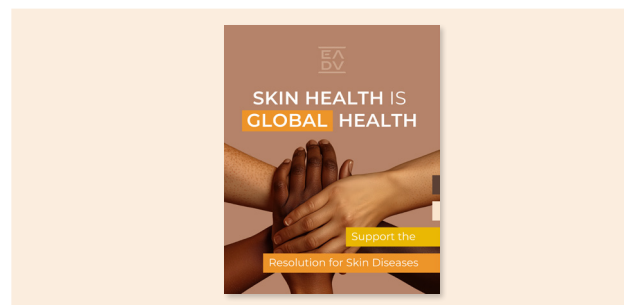

Looking at skin and venereological diseases from a **women's health** angle, to engage with policymakers at a time of **focus on gender issues**.

Raising awareness about the **dangers of sunbeds** and the need for stronger regulation against them (i.e. banning use for minors, proper information to adult users).

STRENGTHENING PREVENTION, EARLY DETECTION AND TIMELY TREATMENT OF SKIN DISEASES

Another landmark achievement in 2025 was the adoption of a **World Health Assembly Resolution** recognizing skin diseases as a **global health priority**.

The Resolution calls on the World Health Organization to develop the first-ever Global Action Plan on skin diseases and urges governments to prioritise skin health in national programmes. EADV supported the Resolution, sponsored by GlobalSkin and ILDS (the International League of Dermatological Societies), and disseminated it to EU policymakers. EADV is planning an event in

2026, in collaboration with the Vice President of the European Parliament, to discuss the Resolution's implementation.

EADV is also engaging the European Parliament to ensure that skin diseases prevention, early diagnosis and effective treatment are reflected in upcoming 2026 reports on cancer, cardiovascular diseases, rare diseases, and women's health.

ADDRESSING WOMEN'S HEALTH

Women's health remains a key priority for EADV. Since January, EADV has collaborated with the European Parliament's Committee on Women's Rights to address the disproportionate impact of skin diseases and sexually transmitted infections on women. EADV has highlighted to MEPs the harmful influence of social media beauty standards, which encourage early sunbed use, as well as gender imbalances in clinical trials. EADV will continue leveraging its Parliamentary contacts to ensure these issues are effectively addressed by policymakers.

RAISING POLITICAL ATTENTION ON SUNBEDS

In early 2025, the European Commission abandoned its planned Recommendation on UV exposure from sunbeds, citing a lack of new evidence beyond existing EU safety provisions. This prompted EADV to mobilise the whole cancer and dermatology community and to engage with key policymakers to achieve more measures against sunbeds use, particularly for minors:

EADV immediately wrote to key Members of the European Parliament (MEPs) and national health delegations, condemning the Commission's decision and urging other EU institutions to act.

On 14 May, EADV co-hosted the high-level event "Beyond the Glow: The Harmful Effects of Sunbeds on Public Health" at the European Parliament, together with the Vice-President of the Health Committee. Nearly 50 participants –MEPs, patient organisations, and scientific societies –called for stronger EU regulation of sunbeds.

Following the event, in collaboration with the European Cancer Organisation and other associations, EADV sent two letters to the European Commission, reiterating EADV's asks for EU-wide regulation on sunbeds use (beyond the existing sunbeds safety standards) and a recommendation to not use sunbeds in the 5th European Code Against Cancer.

Furthermore, three MEPs -with EADV's input- also pressed the Commission on sunbeds from the angles of consumer protection, women's health, and social media safety.

These collective efforts have already delivered tangible results:

- In May, Denmark announced a ban on sunbeds for minors. Few months before, EADV had provided evidence to the Danish Health Ministry making the case for such measure.
- In July, the Irish Institute of Health released a report (citing EADV evidence), recommending a ban on commercial sunbeds, a measure that Irish Prime Minister is now evaluating. EADV met with the Irish delegation to the EU and joined a workshop hosted by Irish Ministry of Health to encourage similar measures across the EU Member States next year.
- In October, a study by the European Parliament Research Service highlighted the cancer risks of sunbed use and noted fragmented national approaches. This will inform a Parliament's position on cancer, on which EADV is already advocating to include robust asks on sunbeds regulation.
- In November, the European Commission and the World Health Organization released their [5th European Code Against Cancer](#), which includes a clear recommendation to "never use sunbeds". It also calls policymakers to support, harmonize and enforce policies against exposure to UV radiation across the EU, especially for minors.

Following the pressure from the EADV community and the Parliament, [the Commission is starting to change its position](#), considering additional measures against sunbeds should new evidence emerged.

In conclusion, 2025 has been a year of bold action for skin and venereological health, paving the way for meaningful progress in the next years across Europe and beyond. EADV remains steadfast in its mission to improve the quality of life of people living with skin and venereal diseases, ensuring that everyone has the care and wellbeing they deserve.

FINANCES

As in previous years, the EADV was in 2025 able to increase both the number of members and the participants to the annual Congress.

- The EADV Congress in Paris resulted in a financial success, with €24.7M revenue. The costs of organizing this event have increased in line with the revenue increase.
- The financial results of the EADV Symposium in Prague continued to be challenging with a loss of €0.8M.
- Extra income is primarily spent on public utility activities, such as research projects (€1.1M), development & education (€0.9M) and scholarships. In total €4.2M was spent in 2025 on medical training.
- The finances of the EADV were audited by KPMG and were found to comply with Swiss law and the Association's articles of incorporation. Internal (financial) procedures are audited on a regular basis by an external expert (Udo Schiller Consulting).
- The Treasurer operates in close contact with the Financial Department of the EADV, the Finance Committee. On an international level the treasurer participated in meetings with treasurers from the ILDS and ISD during the EADV Congress 2025 in Paris, the MEIDAM Congress 2025 in Dubai and the AAD Annual Meeting in Orlando. Topics that were discussed related to investments, interaction with industry, strategic planning and governance.
