EUROPEAN ACADEMY OF DERMATOLOGY & VENEREOLOGY

Understanding and Treating Nail Disorders

Combined Course (Specialists & Residents) | 1-3 April 2027 | Lisbon, Portugal

Description

This course is designed for physicians interested in understanding and treating nail pathologies, both residents and dermatologists already in training.
It will be led by internationally recognized experts who will show how to approach and understand nail signs and make a diagnosis. A therapeutic algorithm will be provided for optimal management of the various nail disorders. Discussions with the speakers will be easy and interactive.

Learning Objectives

1. Learn the anatomy and physiology of the nail unit in order better understand pathophysiology of nail disorders and surgical procedures.
2. Diagnose and treat infectious nails diseases, especially onychomycosis, as well as inflammatory nail disorders.
3. Recognize tumours of the nail unit, benign or malignant and learn their management.

Faculty

Chairs: Bertrand Richert
Speakers: Matilde Iorizzo, Pauline Lecerf, André Lencastre
Tutors: TBA
